

XAVIER PEREZ

Senior Full-Stack Product Engineer | Software, Cloud, and Technical Evaluation

Quito, Ecuador | Spanish: Native | English: Fluent
thexap.com | [Upwork profile](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior full-stack product engineer with 9+ years delivering production software across web applications, backend services, APIs, databases, testing, and cloud infrastructure. Experienced in turning requirements into architecture, reviewing technical work, identifying risks, and verifying results. Uses AI-assisted workflows for research, implementation, and review while remaining responsible for final decisions.

RELEVANT EXPERTISE

Architecture and code review	AWS and cloud integrations	REST and GraphQL APIs
Authentication and multi-tenancy	Testing and failure analysis	Technical documentation

EXPERIENCE

Independent Senior Full-Stack Product Engineer | Upwork and direct clients 2016 to present

- Completed 28 Upwork jobs and 15,309 hours with 100% Job Success and Top Rated Plus status, as captured in September 2026.
- Delivered and maintained React, Next.js, TypeScript, Node.js, mobile, and web applications in new and established codebases for distributed teams.
- Worked with AWS Cognito, API Gateway, Lambda, and CDK for authentication, APIs, serverless compute, and infrastructure as code.
- Defined requirements, analyzed trade-offs, implemented changes, investigated failures, and documented handoffs across product and engineering work.
- Built and reviewed unit, integration, Cypress, and end-to-end tests to verify behavior against expected outcomes.

Product and Engineering Lead | Armonía 2023 to 2026

- Led discovery, UX, architecture, and full-stack delivery of a public website and private operating application for a psychology practice.
- Replaced an expanding operational spreadsheet through a staged transition; the practice owner now uses the dedicated application as her primary system.
- Implemented React, TypeScript, Node.js/Hono, PostgreSQL, Clerk, OAuth, webhooks, and Google Calendar synchronization with clear privacy boundaries.

AI AND EVALUATION APPROACH

- Uses prompts and AI coding tools to support research, implementation, and technical review, then checks conclusions against source material and acceptance criteria.
- Separates verified results from assumptions, records limitations, and gives precise feedback on correctness, risk, maintainability, and missing evidence.

CERTIFICATION

AWS Certified AI Practitioner | Issued April 2026 | Expires April 2029
